Session 1: Readiness audit and personal AI assistant

Executive AI Mindset & Strategic Landscape

Your outcome

Choose one recurring task, compare a basic prompt with a structured prompt, then turn the better version into reusable assistant instructions.

Before you begin

Choose one repetitive task from your friction log. Bring a made-up input and note how long the task normally takes. Open an AI tool your organization permits.

Participant details

Name: _____ Cohort: _____
Project / task: _____

Working boundaries

Use fictional or explicitly approved examples. Do not paste private customer, employee, health or financial records into public AI tools. Follow your organization's tool and data rules. Treat outputs as drafts; a person verifies facts and approves external actions.

What to keep

Keep a copy of your inputs, outputs, decisions and revisions. Browser-only drafts may not follow you to another device. Upload the completed resource or share a permitted link through your participant dashboard.

Course coaching

Each cohort participant may request one remote coaching session during the course. Request it inside the platform; your instructor confirms the time. Use the same conversation for time changes.

Lab guide

Follow your instructor or work through these steps using approved tools. A document or manual simulation is acceptable when a connected tool is unavailable; label its status honestly.

Step 1

Describe the task, its owner, and what a useful result looks like. Ask the AI to identify the weakest assumption in your plan.

Step 2

Write a brief with role, task, context, constraints, output format, and instructions to ask a clarifying question when important information is missing.

Step 3

Run a basic prompt and your structured brief on the same synthetic input. Compare errors, missing facts, and correction time; revise one instruction.

Worked example — fictional / illustrative

Fictional example: Northstar Services needs an action list from made-up notes. A useful result preserves the three source actions, labels a missing owner as 'unassigned', and asks one clarification. No message is sent.

Try the prompt sheet

Use the companion prompt sheet as a starting point, replace bracketed fields and test the result. It is not a guarantee of accuracy or an instruction to publish anything.

Participant worksheet

Complete the fields below. Use the editable Word version if you need more space. Label evidence you have not collected yet as unknown.

My recurring task / user / frequency

_____
_____

Current method and baseline minutes

_____
_____

Data I am allowed to use / tool approval

_____
_____

AI fit: use, use with review, or do not use; why

_____
_____

Basic prompt / observed weakness

_____
_____

Participant worksheet — continued

Complete the fields below. Use the editable Word version if you need more space. Label evidence you have not collected yet as unknown.

Structured prompt: role, context, constraints, output, checks

_____
_____

Assistant instructions / how to reopen them

_____
_____

Test inputs and outputs / corrections

_____
_____

Readiness opportunity: effort, value, risk, next decision

_____
_____

Test, challenge and improve

Test 1

Routine: draft a follow-up from fictional meeting notes with three agreed actions.

Expected result: _____
Actual result / evidence: _____
Correction or decision: _____

Test 2

Missing information: remove an action owner and one deadline. The assistant must mark them unknown rather than invent them.

Expected result: _____
Actual result / evidence: _____
Correction or decision: _____

Test 3

Boundary: include a fictional request to paste confidential customer records. Identify a permitted alternative before using a tool.

Expected result: _____
Actual result / evidence: _____
Correction or decision: _____

Transfer challenge

Remove a deadline from your sample and rerun the prompt. Record whether the assistant marks the gap and whether you can explain its limits.

Review and submit

Mark each criterion ready, needs revision, or not applicable with a reason. An instructor reviews the evidence; completing a worksheet alone does not establish approval or certificate eligibility.

[ ] Ready [ ] Revise [ ] N/A — One specific task, owner, frequency, and baseline duration are recorded.

[ ] Ready [ ] Revise [ ] N/A — The prompt includes context, constraints, and a clear output format.

[ ] Ready [ ] Revise [ ] N/A — A synthetic input and sample output show what was tested.

[ ] Ready [ ] Revise [ ] N/A — Data boundaries and human checks are explicit.

[ ] Ready [ ] Revise [ ] N/A — One limitation and the next experiment are identified.

Submission

Submit under AI Readiness Audit in My work. Include your artifact or permitted link, test evidence and notes about what changed. Save a draft if it is not ready for review.

Feedback and follow-through

Feedback received: _____
Change I made: _____
Evidence retested: _____
My next action / owner / review point: _____
