Session 3: Executive triage and time evidence

The 5-Hour Workweek Reclaim & Executive Workflows

Your outcome

Build a repeatable triage workspace that turns fictional requests into a checked action list. Measure the complete task, including review.

Before you begin

Choose a recurring triage task. Bring synthetic notes or emails and your baseline time. Include one ambiguous request.

Participant details

Name: _____ Cohort: _____
Project / task: _____

Working boundaries

Use fictional or explicitly approved examples. Do not paste private customer, employee, health or financial records into public AI tools. Follow your organization's tool and data rules. Treat outputs as drafts; a person verifies facts and approves external actions.

What to keep

Keep a copy of your inputs, outputs, decisions and revisions. Browser-only drafts may not follow you to another device. Upload the completed resource or share a permitted link through your participant dashboard.

Course coaching

Each cohort participant may request one remote coaching session during the course. Request it inside the platform; your instructor confirms the time. Use the same conversation for time changes.

Lab guide

Follow your instructor or work through these steps using approved tools. A document or manual simulation is acceptable when a connected tool is unavailable; label its status honestly.

Step 1

Define priority rules and the fields a useful action list needs. Interview yourself about the recurring decisions you currently make.

Step 2

Save a reusable playbook with inputs, examples, output format, missing-data rules, and checks. Reopen it in a fresh task and confirm the assistant is using the current instructions.

Step 3

Test a routine case, a missing-information case, and a conflicting case. Time the complete task including correction; update the playbook after the weakest result.

Worked example — fictional / illustrative

Illustrative numbers only: a baseline task takes 30 minutes; AI preparation, execution, review and correction total 22 minutes. Net savings are 8 minutes per comparable run. If one run needs 35 minutes, report the 5-minute loss too. Do not treat this example as your result.

Try the prompt sheet

Use the companion prompt sheet as a starting point, replace bracketed fields and test the result. It is not a guarantee of accuracy or an instruction to publish anything.

Participant worksheet

Complete the fields below. Use the editable Word version if you need more space. Label evidence you have not collected yet as unknown.

Task / owner / comparable baseline method

_____
_____

Priority rules and escalation rules

_____
_____

Required columns: priority, action, owner, deadline, uncertainty

_____
_____

Reusable instructions and example of acceptable output

_____
_____

Where the playbook is saved / version

_____
_____

Participant worksheet — continued

Complete the fields below. Use the editable Word version if you need more space. Label evidence you have not collected yet as unknown.

Routine, missing-data and conflict test results

_____
_____

Baseline / preparation / run / review / correction minutes

_____
_____

Quality errors and what changed

_____
_____

Adopt, revise or stop; evidence supporting the decision

_____
_____

Test, challenge and improve

Test 1

Routine: five fictional requests with known owners and deadlines.

Expected result: _____
Actual result / evidence: _____
Correction or decision: _____

Test 2

Missing information: two requests have no deadline; one has no owner.

Expected result: _____
Actual result / evidence: _____
Correction or decision: _____

Test 3

Conflict: two notes give different deadlines for the same task. The output must flag the conflict for a person to resolve.

Expected result: _____
Actual result / evidence: _____
Correction or decision: _____

Transfer challenge

Run three comparable trials. Calculate net savings = baseline minus (preparation + AI run + review + correction). Do not double-count overlapping time. Report quality failures alongside time.

Review and submit

Mark each criterion ready, needs revision, or not applicable with a reason. An instructor reviews the evidence; completing a worksheet alone does not establish approval or certificate eligibility.

[ ] Ready [ ] Revise [ ] N/A — Priority rules and required output fields are explicit.

[ ] Ready [ ] Revise [ ] N/A — The template handles missing or contradictory information.

[ ] Ready [ ] Revise [ ] N/A — At least two test inputs and outputs are included.

[ ] Ready [ ] Revise [ ] N/A — Timing includes human review, with no assumed savings.

[ ] Ready [ ] Revise [ ] N/A — A reusable template and a clear hand-off are provided.

Submission

Submit under Executive Triage Workspace in My work. Include your artifact or permitted link, test evidence and notes about what changed. Save a draft if it is not ready for review.

Feedback and follow-through

Feedback received: _____
Change I made: _____
Evidence retested: _____
My next action / owner / review point: _____
