Session 7: Capstone evidence and adoption package

Capstone Incubator & Change Management

Your outcome

Bring your working artifact, measured evidence and limitations together into a stakeholder decision and a 30/60/90-day plan.

Before you begin

Bring your capstone problem, working artifact, prior feedback, and baseline/result evidence. Mark assumptions and missing evidence honestly.

Participant details

Name: _____ Cohort: _____
Project / task: _____

Working boundaries

Use fictional or explicitly approved examples. Do not paste private customer, employee, health or financial records into public AI tools. Follow your organization's tool and data rules. Treat outputs as drafts; a person verifies facts and approves external actions.

What to keep

Keep a copy of your inputs, outputs, decisions and revisions. Browser-only drafts may not follow you to another device. Upload the completed resource or share a permitted link through your participant dashboard.

Course coaching

Each cohort participant may request one remote coaching session during the course. Request it inside the platform; your instructor confirms the time. Use the same conversation for time changes.

Lab guide

Follow your instructor or work through these steps using approved tools. A document or manual simulation is acceptable when a connected tool is unavailable; label its status honestly.

Step 1

Tell the story: problem, solution, test result, and remaining risk.

Step 2

Run a two-minute dry pitch and capture one challenge from a peer.

Step 3

Bundle the artifact, operating guidance, evidence, and a 30/60/90-day adoption plan.

Worked example — fictional / illustrative

Illustrative example: three trials suggest an 8-minute saving per comparable task, but one quality defect remains. The recommendation is a limited pilot with a named reviewer, not organization-wide deployment or guaranteed ROI.

Try the prompt sheet

Use the companion prompt sheet as a starting point, replace bracketed fields and test the result. It is not a guarantee of accuracy or an instruction to publish anything.

Participant worksheet

Complete the fields below. Use the editable Word version if you need more space. Label evidence you have not collected yet as unknown.

Problem / intended user / accountable owner

_____
_____

Working artifact link and operating instructions

_____
_____

Baseline method / assisted method / sample count

_____
_____

Observed timing, quality and review evidence

_____
_____

Assumptions / limitations / unresolved risks

_____
_____

Participant worksheet — continued

Complete the fields below. Use the editable Word version if you need more space. Label evidence you have not collected yet as unknown.

Peer feedback and what changed

_____

_____

30 days: owner, experiment and success condition

_____

_____

60 days: scope, evidence and decision

_____

_____

90 days: support, review and continuation or stop decision

_____

_____

Test, challenge and improve

Test 1

Evidence: compare baseline and assisted work using comparable tasks and count review and correction effort.

Expected result: _____
Actual result / evidence: _____
Correction or decision: _____

Test 2

Challenge: a peer questions your strongest benefit claim. Show the actual sample count and the weakest observed result.

Expected result: _____
Actual result / evidence: _____
Correction or decision: _____

Test 3

Adoption: identify who supports the workflow, how it is paused and what result would make you stop or narrow the pilot.

Expected result: _____
Actual result / evidence: _____
Correction or decision: _____

Transfer challenge

Rehearse a two-minute pitch. Ask a peer to challenge the weakest assumption and document the change you make before the final showcase.

Review and submit

Mark each criterion ready, needs revision, or not applicable with a reason. An instructor reviews the evidence; completing a worksheet alone does not establish approval or certificate eligibility.

[ ] Ready [ ] Revise [ ] N/A — The problem, intended user, and working artifact are linked.

[ ] Ready [ ] Revise [ ] N/A — Baseline and results include method, sample count, and human review effort.

[ ] Ready [ ] Revise [ ] N/A — Limitations, data boundaries, and quality checks are explicit.

[ ] Ready [ ] Revise [ ] N/A — Peer feedback and the resulting change are documented.

[ ] Ready [ ] Revise [ ] N/A — The 30/60/90-day plan names owners and adoption decisions.

Submission

Submit under Stakeholder Capstone Package in My work. Include your artifact or permitted link, test evidence and notes about what changed. Save a draft if it is not ready for review.

Feedback and follow-through

Feedback received: _____
Change I made: _____
Evidence retested: _____
My next action / owner / review point: _____
